

## **COMMERCIAL PROPERTY REPORT**

### **March 2016**

This report highlights property transactions with a value of more than R5million that have occurred since January 2012 and should be viewed in conjunction with the Property section in [www.lightstoneexplore.co.za](http://www.lightstoneexplore.co.za) which carries all the transactions in a spatial environment.

SA Revealed has taken every care in compiling information and material for this report, but will not be held responsible for any loss, damage or inconvenience caused as a result of any inaccuracy or error contained in this report

## **OVERVIEW OF REPORT AND WEBSITE**

This COMMERCIAL PROPERTY REPORT and the PROPERTY section of the Lightstone Explore website [www.lightstoneexplore.co.za](http://www.lightstoneexplore.co.za) should be used in conjunction, and provides a comprehensive view of the Commercial Property environment in South Africa

### **EVERYTHING IN THE REPORT CAN BE EXAMINED IN DETAIL ON THE WEBSITE**

The website is updated by the fifth of every month and the report is published by the tenth of the month. The updates are governed by the feed date of the transactions from the Deeds Office

The segmentation of location (“Node”) and buyer (“Owner”) are reflected in the Report and can be viewed by selection on the Website

**Large Transactions and Large Bonds** – These sections of the website focus on data from January 2013, where the property owner is a non-person, and the purchase or bond value is greater than R5million. The detail of the individual transactions can be seen on the map on the, whilst aggregation allows for the information to be reflected in the report. Filters can be used to view the data on the website. We have not removed related transactions (eg. portfolio consolidation within related companies) and this could have an impact on overall number

**Listed Property** – This section covers all properties owned by listed property companies

**Cadastral** – This layer shows the property boundaries of properties in the country, described by the property description. By searching for a property in this section, the property can be identified and Google aerial photography, and Street View can be used to view the property. We will shortly link ownership information to this section

**Investment Heat Map** – There are three levels of information shown as hexagon layers. The layers open at different zoom levels. The full view of South Africa shows the large hexagons of around 288km<sup>2</sup> in area, the medium hexagons show an area of around 6.5km<sup>2</sup>, and the small hexagon layer an area of 1.6km<sup>2</sup>. Each hexagon carries a ranking in accordance with the relative level of investment in that hexagon (1 being the highest level)

# 1 March 2016 Summary

The data reflects transactions over R5 million that were processed through the Deeds Office from January 2013, showing transactions for the month of March 2016, the last 12 months, the cumulative position for the current year, and the full view for 2015, 2014 and 2013

## 5 DIRECTORS

### 5.1 Director Value

**Director Value identifies those directors that have the greatest involvement in property via their directorships.**

The band is defined by the proportional value of the properties that the director is involved in (property value divided by number of directors in the property owning company). The aim is to identify the most important directors in terms of ownership and activity.

There are 31678 directors involved in companies with their proportional property value exceeding R5 million. Of these 4628 directors were involved in purchasing properties during the last 12 months and 174 during the last month.

| Band                           | Total         | 2016 YTD     | March 2016 |
|--------------------------------|---------------|--------------|------------|
| A: Greater than R1bill         | 74            | 66           | 29         |

### 5.2 Director Activity

**Director Activity is an indication of the level of recent property purchases that directors are involved in the property market, in relation to their total property holding.**

- High Activity - the director is involved in transactions during the year where the property value is more than 80% of the total property value of the portfolio
- Medium Activity – the director is involved in transactions during the year where the property value is 50 – 80% of the total property value of the portfolio
- Normal Activity - the director is involved in transactions during the year where the property value is less than 50% of the total property value of the portfolio

The number of directors active in purchases which were processed in the deeds office during the last month, in terms of Activity and Value levels, are:

## METHODOLOGY

Three databases have been combined to create this unique view of the property market, namely:

- Deeds Office - Which shows all property transactions that have been registered in the Deeds Office
- CIPC - Company Registration data showing directorships linked to all property owning companies in the Deeds data
- Cadastral - Each property can be linked to the cadastral database which provides the exact spatial location of the property

Data is updated weekly, collated and propagated monthly.

In phase 1, we are looking at transactions greater than R5million.

There will be three forms of delivery:

Snap Report – Weekly – a summary of significant or interesting transactions that occurred – each Thursday

Detailed Report – Monthly – a detailed analysis of transactions that occurred in the month – 10 working days after month end

Website – spatially enabled web site that will enable the user to perform interactive on line analysis of commercial data.

We have segmented the database into a number of segments:

- Owner Segment
- Spatial - Municipality or Node
- Property Type
- Director Relevance
- Bond Activity

The data is populated into a relational database that allows us to cut and dice the data into intelligent segments.
